

## Louis A. King Chairman of the Board, Kintronic Laboratories, Inc.

Louis King, founder of Kintronic Labs, Inc., raised his family and ran his business as a disciple of Jesus Christ holding fast to Biblical principles in his personal and business relationships. His intent in starting his own business was "to help the little man get started in the radio business." He began with very little in office space provided by his father in downtown Bristol, TN, building on a solid reputation of honesty and integrity. He has seen his business grow from a small regional manufacturing business to a recognized leader in AM broadcast antenna systems worldwide.

More recently, Kintronic Labs has become more focused in supporting Christian radio efforts worldwide. His goal has been to use the firm as a facilitator to enable all major people groups to have the opportunity to hear the Gospel of Jesus Christ in a language they can understand. This goal and vision has resulted in opportunities with Trans World Radio, Far East Broadcasting Company and many other Christian ministries to help provide Christian radio programming to a potential audience of well over one billion people. He is grateful to Almighty God for allowing his service in the furthering of His kingdom on earth, knowing it is his highest calling.

## IMPACT AWARD

*This award is presented to a person, station, network, or ministry that has demonstrated significant ministry impact. The recipient must uniquely impact their market (or beyond) through an activity, program, event, invention, etc., that extends far beyond the standard involvement, expectations, or accomplishments of the Christian radio industry. This award is designed to recognize the "behind the scenes" people and organizations that often go unnoticed or unrewarded for their outstanding and unique efforts.*
